ADVANCE

Envision a truly new way of advancing your business.

A way that energizes the exchange of ideas. A way that unleashes astonishing productivity, generates stellar work, and transforms the user experience.

A way that keeps your data secure and your work flowing smoothly. All with respect for the environment.

Introducing the imageRUNNER® ADVANCE Series.

A dramatically new platform that redefines how you access, share, and manage communications.

With its expanded functions and transparent integration of hardware, software, and services, you'll enjoy true productivity at every level to help you create spectacular work in far less time. And this gives you the opportunity to focus on ideas and innovations that will advance your business—now and in the future.

Canon, long renowned for its cutting-edge technologies and superb quality, is proud to offer a breakthrough in the way business communicates.

Stunning. Inside and out.

Advanced design.

Imagine a marriage of beauty and brains that raises your ability to communicate to new levels. Picture a work partner that understands all your tasks and makes accomplishing them a breeze. The imageRUNNER ADVANCE Series brings your vision to life with an elegant, intuitive design that supports world-class efficiency with amazing ease.

User-inspired innovation

Canon's strong partnerships have provided both the insight and inspiration to developing cutting-edge solutions for real-world business demands. Canon knows that time is critical. And with the right tools, anyone can manage tasks efficiently and deliver the highest quality products, each and every time. The key is communication of all parts—the ideal fusion of vision and technology that empowers people beyond the ordinary. It's this very dedication to technological innovation and real-world testing that allows the imageRUNNER ADVANCE Series to deliver solutions far beyond conventional expectations.

The power of two

Super-fast. Powerful. Precise. Canon's new Advanced imageCHIP architecture has two central control systems that work together to accomplish multiple tasks simultaneously, with the accelerated speed your work demands. The imageRUNNER ADVANCE Series offers superb image quality and exceptional flexibility. Its new system design supports a vast array of features to simplify your workflow and ensure impressive output at a breathtaking pace.

A beautiful way to work

Form embraces function with a smooth, universal design that's not only appealing to the eye, but also affords all users operation that's easy, comfortable, and accessible. The clever, "soft-touch" user interface allows novices and experienced users alike a satisfying way to work. The compact footprint, soft curves, and natural, soothing color palette of the imageRUNNER ADVANCE Series create a beautiful harmony between innovation and your work environment.

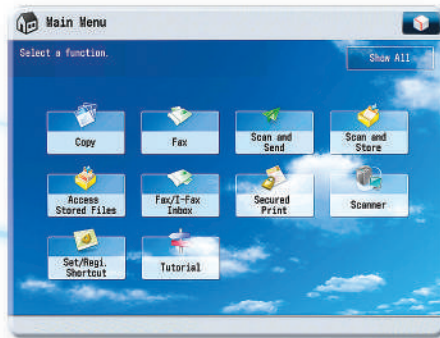

A custom fit

The Canon imageRUNNER ADVANCE Series has an eye on the future. Engineered for adaptability, these models help you achieve your changing goals as your business grows. Users have the power to personalize the systems with ease and, with the touch of a button, they can simplify tasks with specific, custom solutions for any size business.

The only way to work—simple, smart, seamless.

Advanced workflow.

It's more than just getting the job done. It's the experience of being able to accomplish so much more than you can imagine and in so much less time. Whether you're in front of the intuitive user interface or sitting right at your desktop, the imageRUNNER ADVANCE Series empowers you to master seamless workflow and productivity.

A bold, brilliant new interface

Witness the rebirth of intelligence and power. Completely redesigned, the highly responsive, flexible user interface is all about simplicity and ease. Two menus streamline your workflow. Just a stroke of the Main Menu keys gives you instant access to device functions while the Quick Menu powers productivity by allowing you to combine and access routine tasks at the touch of one button.

A seamless connection

Whether from the imageRUNNER ADVANCE model or your own desk, you can have direct access to the functions that make your work easier. The imageRUNNER ADVANCE Desktop utility features a clear, comprehensive PC interface that transforms your computer into a central command station. Now you can perform personal document workflow tasks, such as archiving, merging, and distributing, all from the desktop with “drag-and-drop” simplicity. You can also search for documents with ease, and even monitor the status of your work from any location on the network.

Smart productivity

You'll accomplish more with less effort. By streamlining steps, the imageRUNNER ADVANCE Series helps you move information and generate output more quickly. Complicated or repeated tasks can be assigned to a single button, speeding workflow and improving accuracy. The minutes saved at every step add up to big increases in effectiveness and cost savings.

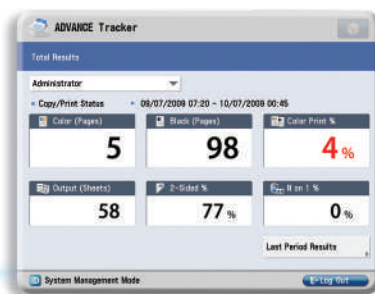

Work better together

With more people working together from more places, effective collaboration is vital. Advanced Box, Canon's unique built-in document sharing solution, streamlines the exchange of information. The integrated system and enhanced storage features let you retrieve and edit files, save them in native formats, and share them readily with your colleagues. The imageRUNNER ADVANCE Series seamlessly bridges the paper and digital worlds.

Easy setup, administration, and security.

Advanced control.

It's a big responsibility. But no matter what the size of your business, Canon lets you breathe more easily. Whether managing a fleet of devices or a single unit, businesses need to encourage collaboration, without compromising security. And with productivity paramount, administrators need simple, centralized control to keep networked devices operating efficiently while containing costs.

Powerful command

Canon delivers complete integration of software and hardware for centralized, scalable control in every business operation. The Series' new Remote UI lets you monitor a single device, while the imageWARE Enterprise Management Console lets you track the activity of an entire fleet—even receive automated e-mail notifications if toner is low or a tray is out of paper. With both utilities, administrators can easily check job status and supply levels. And the streamlined user interfaces maximize uptime and keep you in charge of the process at every step.

Maximize your resources

Today, more than ever, optimizing resources is critical, and so the imageRUNNER ADVANCE Series makes it easier to track, manage, and influence user behavior. From analyzing color output by employee or client to encouraging double-sided printing, you can ensure that resources are employed optimally and costs are allocated accurately.

Secure access

The balance between device security and staff productivity has never been so effortless. Positive user identification provides a valuable safeguard. With role-based permissions, administrators can easily allow certain functions only to authorized users, without hindering unrestricted tasks. And user information can be recorded in logs and reports.

Protect your data and your business

The imageRUNNER ADVANCE Series offers multilayered solutions that help businesses meet their goals of privacy and protection. From installation to retirement, this Series has solutions that safeguard your confidential information and support security compliance. All models have a Trusted Platform Module, a new security chip with tamper-resistant hardware that provides protection of vulnerable settings like passwords. Options such as removable hard drives help ensure that data may be safely secured. And data erase and encryption options offer true peace of mind.

An impressive return on investment.

Advanced performance.

On every count, the imageRUNNER ADVANCE Series performs. Professional in-house capabilities streamline your workflow and produce striking results. Canon offers a consistent platform that integrates easily into any office environment, increasing uptime and promoting seamless communication and collaboration.

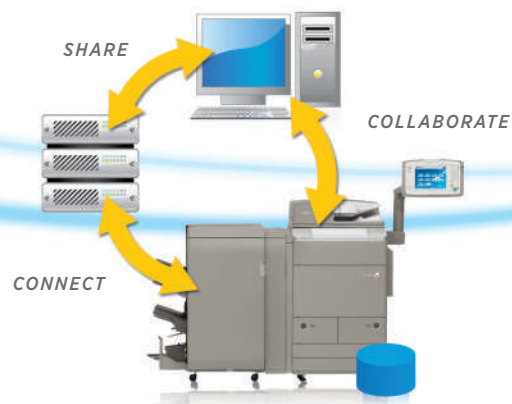

Make a brilliant impression

Give your business a competitive edge by producing professional-quality presentations, reports, and newsletters. Thanks to Canon's new technology, image quality is beautifully enhanced. You can easily generate accurate, high-impact color or crisp black-and-white results on demand. And with the extensive array of finishing capabilities available on the imageRUNNER ADVANCE Series, the possibilities are almost endless.

Reduce costs, increase performance

When productivity soars, so do business profits. With the imageRUNNER ADVANCE Series, information processes are stunningly streamlined and automated. With the management power Advanced Box offers, teams are free to generate competitive new ideas. Repetitive steps and extra hardware installation are eliminated with smart features such as Remote Fax.

Easy integration

Each business has special issues that require unique solutions. With its brilliant architecture and versatile platform, the imageRUNNER ADVANCE Series allows for custom applications to be developed and seamlessly implemented. Building on Canon's innovative MEAP® platform, this exceptional Series brings new levels of connector and link support to enhance communication with existing systems and integration with those you may acquire in the future.

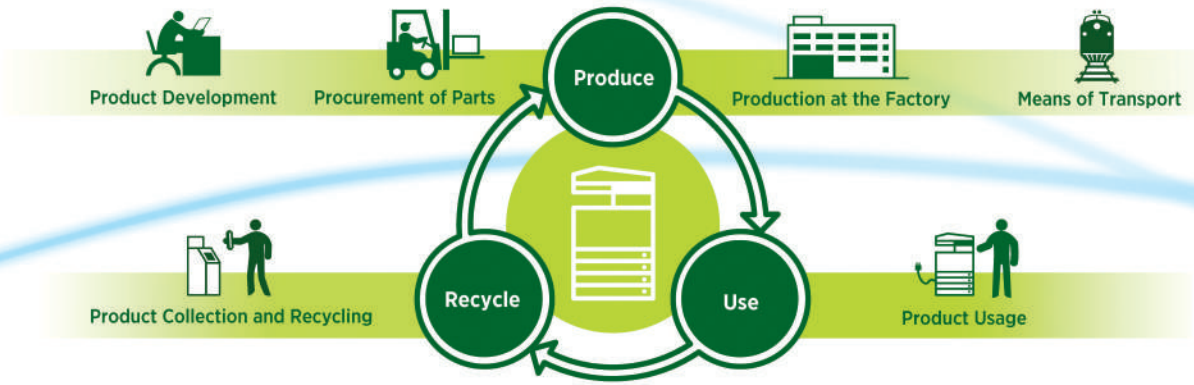

Lots of uptime

Canon incorporates signature reliability into every imageRUNNER ADVANCE Series model. Status notifications keep you ahead of the game, and toner can even be replaced on-the-fly. If the correct paper size or stock for a job is unavailable, the system will begin the next job without delay. And with access to the latest technology and simple, clear upgrades, you can power through your jobs, giving you more time to devote to other business areas.

Sustaining our environment.

Advanced responsibility.

Canon shares your commitment. With the imageRUNNER ADVANCE Series, Canon has developed leading-edge technologies with a stronger environmental focus. For every stage of the product life cycle, Canon has created solutions that reduce its environmental footprint—and yours.

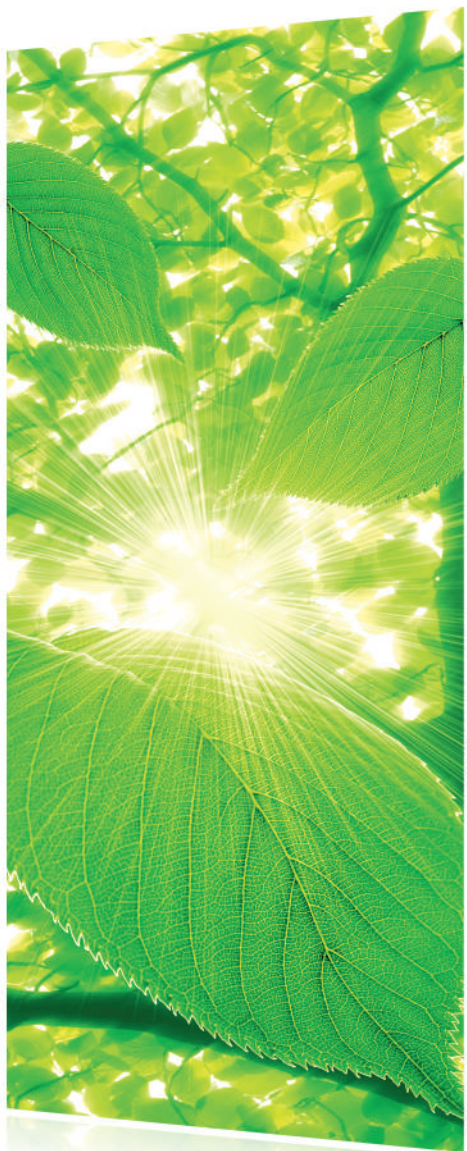

Reduction of CO₂ emissions

Through its Life Cycle Assessment (LCA) System, Canon has lowered CO₂ emissions by more than 30% over previous models by focusing on each stage of the product life cycle, including manufacturing, energy use, and logistics. These products are designed to be the smallest and lightest in their class, with less packaging to make transportation more efficient.

Eco-friendly design

Canon is making a difference through creative ecological thinking. The imageRUNNER ADVANCE models employ certain components fabricated with 100% recycled plastic from retired products. Canon's innovative green technologies also include bio-based plastic, a plant-derived compound that replaces certain petroleum-based plastic parts.

A greener way to work

A visionary company, Canon knows that the world and the workplace need a greener workflow. The imageRUNNER ADVANCE Series delivers just that. Now organizations across the globe can seamlessly share and distribute digital documents. And because you can preview files prior to printing, changes can be made before committing toner to paper to avoid print errors. Administrators can even encourage duplex printing to help reduce waste and save paper as well as optimize color usage throughout the enterprise.

Greater energy efficiency

From the inside out, the imageRUNNER ADVANCE Series is designed for high energy efficiency and stellar performance. The combination of Canon's fusing technologies and new pQ toner helps to reduce overall energy consumption by minimizing heat and power requirements. The Series' new duplex color image reader captures superb-quality images at impressive speeds while using less energy than ever. With advanced technologies present in each model, the Series meets ENERGY STAR® standards.

Reducing pollution

All suppliers are required to meet Canon's stringent Green Procurement policy and environmental terms. This helps Canon exceed the toughest global standards set by the EU RoHS Directive, which requires the restriction of six specified hazardous substances. Canon currently restricts the use of 24 such substances.

ADVANCE

It will transform the way you work.

The imageRUNNER ADVANCE Series offers every user the tools and resources to communicate and collaborate, all in a remarkably simple, smart, and seamless way.

With the reward of more time and stronger connections, teams will enjoy the opportunity to generate the powerful ideas that drive your ongoing success.

There's a model that's right for every size business, now and in the future. With the Series' integrated platform and leading-edge features, you'll appreciate the range of flexible solutions Canon offers.

And you can be confident. Canon's unsurpassed standards of quality, security, and performance will exceed your expectations for years to come.

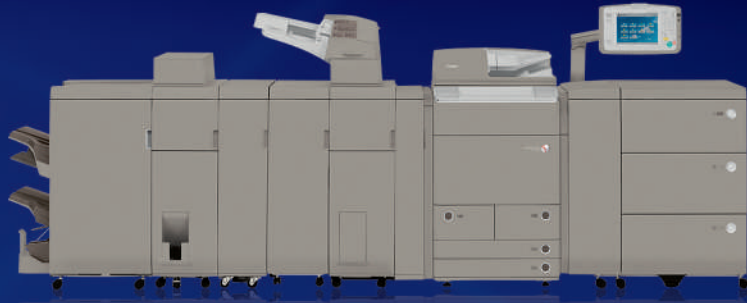

Do more than envision a better way to work. Experience it for yourself.

imageRUNNER ADVANCE Product Line-up

Light Production Solutions

imageRUNNER ADVANCE C9075 PRO/C9065 PRO

High speeds, high volume for light production environments

- Print speed (letter):
C9075 PRO: Up to 75/70 ppm (B/W, Color)
C9065 PRO: Up to 65/65 ppm (B/W, Color)
- Paper capacity (sheets): 3,400 standard; 9,300 maximum
- Paper size: 13" x 19-1/4" maximum
- Print resolution: 1200 x 1200 dpi
- Scan speeds: Up to 200/140 ipm (300 dpi)
(B/W, Color, duplex)
- Flexible finishing options

Note: Please refer to product specifications for more detailed information.

Office Solutions

imageRUNNER ADVANCE C7065/C7055

High speeds, high volume for large office workgroups

- Print speed (letter):
C7065: Up to 65/60 ppm (B/W, Color)
C7055: Up to 55/55 ppm (B/W, Color)
- Paper capacity (sheets):
3,400 standard; 6,900 maximum
- Paper size: 13" x 19-1/4" maximum
- Print resolution: 1200 x 1200 dpi
- Scan speeds: Up to 200/140 ipm (300 dpi)
(B/W, Color, duplex)
- High productivity

imageRUNNER ADVANCE C5051/C5045/C5035/C5030

Compact yet powerful for workgroup environments

- Print speed (letter):
C5051: Up to 51/51 ppm (B/W, Color)
C5045: Up to 45/45 ppm (B/W, Color)
C5035: Up to 35/35 ppm (B/W, Color)
C5030: Up to 30/30 ppm (B/W, Color)
- Paper capacity (sheets) : 1,200 standard;
5,000 maximum
- Paper size: 12" x 18" maximum
- Print resolution: 1200 x 1200 dpi
- Scan speeds: Up to 100 ipm (300 dpi)
(B/W, Color, duplex)
- Space-saving design
